Einhell reduces sales forecast for 2011

Einhell Germany AG (ISIN: DE 0005654933) which is listed under the Prime Standard of Deutsche Börse AG announces the following:

According to an unexpected weak business development in November and December the Einhell Group adjusts its sales forecast for 2011.

The ongoing uncertainty on the international financial markets and the noticeable effects of the debt crisis on the economic development and the private consumption causes a buying resistance in some European countries. Einhell anticipates revenues probably on prior-year's level.
